The Combination Products Coalition has initiated a Wiki Project to facilitate public discussion on regulatory issues affecting combination products: <http://combinationproducts.wiki.zoho.com/>. The current topic posted for discussion on the Wiki is the FDA's recently-released draft guidance document, "Technical Considerations for Pen, Jet, and Related Injectors Intended for Use with Drugs and Biological Products". To stimulate thinking and discussion on the guidance, the CPC has posted some ideas for comments. We invite you to visit the Wiki and offer your comments on these ideas.

Comments to the Wiki will be closed on July 10, 2009; comments on the guidance are due to FDA by July 27, 2009. To see the guidance, click [here](#), and for more background and information, click [here](#).

We look forward to your ideas!
